

**Add skills and talent to your business quickly and easily with cost effective leased staff in the Philippines**

## Staff Leasing

Staff leasing makes it easy and affordable for you to have your own dedicated staff, or a complete team, in the Philippines. We provide the office space, the physical resources and all support services. You personally handpick from pre-screened people - we manage them together. Offshore staff leasing is a highly cost-effective and flexible way of adding talent to your business.

While your staff in the Philippines will be legally employed and managed by ourselves, they report to you - either directly via email, Skype or phone - or via the account manager we provide to assist you.

## Simple, flat hourly rate pricing

To keep it simple we quote you a flat hourly rate for each staff member and then bill you this for the hours they actually worked. This not only covers your staff member's base salary, benefits, taxes and insurance - but also the office space, workstations, backed up power and redundant connectivity, management and other support services. There are no extras, no one-time or setup fees and you can terminate the arrangement at any time with 30 days notice.

## Significant cost savings

The costs of providing quality staff from the Philippines is approximately 70% less than most Western countries. There is also the significant saving in capital expenditure to consider such as the extra office space, furniture, workstations, software licenses, bandwidth etc. you won't have to finance.

When you hire employees with our staff leasing service the only outlay on your part is the monthly payment. We take care of all the capital outlay and setup required. You can expand quickly as business opportunities permit. If you need to scale back, you can do this just as fast and without expensive severance packages.

## Access to skilled talent

Our staff leasing program gives you access to a very wide range of skills and talents you can quickly add to your business. Here's just a sample:

- **Knowledge Services** - accounting & financial, bookkeeping, debt collection, medical encoding, healthcare services, insurance data entry, HR admin, recruitment, payroll processing, travel agency support
